Vaidio™ AI Vision Platform Wins Video Analytics and Mobile App Awards

SIA's Annual Award Program Recognizes IronYun Platform Innovation 3rd Year Running

June 25, 2021, Stamford, CT – The [Security Industry Association](#) (SIA) has announced that the Vaidio™ AI Vision Platform from [IronYun USA Inc](#) has won not one but two 2021 [SIA New Product Showcase Awards](#). The flagship awards program, presented in partnership with [ISC West](#), recognizes Vaidio for innovation in Video Analytics and in Mobile Applications.

“SIA is thrilled to recognize the 2021 SIA New Product Showcase honorees, whose products, services, and contributions represent the

Since its inception in 1979, the SIA New Product Showcase has been the security industry's premier product awards program. New products are reviewed by a panel of judges with extensive industry experience, and in 2021, following significant deliberations, the 35 judges presented awards for technologies covering 25+ product and service categories. The 2021 SIA New Product Showcase entries will be on display July 19-21 in Booth 14073 on the ISC West show floor.

Paul Sun, CEO, IronYun USA, says "The Vaidio AI Vision Platform is differentiated by speed, accuracy, flexibility and its vast array of AI video analytics. In past years, SIA recognized our platform for Video Surveillance Data Storage and for Commercial Monitoring. This year, we received the coveted award for the Video Analytics category, a well-deserved recognition of the platform's broad functionality, accuracy, real-world performance, and open integration with almost any IP camera and with 19 of the world's leading VMS's. SIA also recognized the innovation of the Vaidio Cam App, which turns any mobile phone into a live camera stream for Vaidio's real-time analytics. We are proud and grateful to be recognized for new product innovation by SIA for three years running, and even more inspired to keep pushing the Vaidio AI Vision Platform forward."

### **SIA New Product Showcase Award – Video Analytics**

Winner: IronYun Inc. – Vaidio AI Vision Platform 5.0

The Vaidio AI Vision Platform supports a vast array of AI-enabled analytics such as intrusion, facial recognition, license plate recognition, fall, loitering, smoke, fire, capacity, occupancy, PPE detection, and more, straight out of the box. The flexibility of the platform allows customers to combine multiple different analytics in a single environment, often on a single camera, to improve security and safety,

## **SIA New Product Showcase Award – Mobile Solutions (Connected)**

Winner: IronYun Inc. – Vaidio Cam App

The Vaidio Cam App turns any iOS or Android smartphone into a mobile camera live stream that can be analyzed using Vaidio LPR and Facial Recognition. The Vaidio Cam App is good for police officers, for example, who can mount their phone on their dashboard for real-time alerts on stolen license plates without the cost of a dedicated body camera, or anywhere where a mobile camera might be useful for facial-recognition-based access control.

“The 2021 entrants to the SIA New Product Showcase are a remarkable group, and we were impressed by the many notable ideas and new technologies that came in this year,” said Christopher Grniet, chair of the SIA New Product Showcase Committee. “It was a challenge making the final award determinations in this year’s highly competitive program following hours of panel-driven judging and technology demonstrations.”

### **About IronYun**

IronYun USA Inc. is a US company headquartered in Stamford, Connecticut. IronYun’s Vaidio™ AI Vision Platform works with any IP camera, integrates with 19 market-leading VMS’s, and supports a vast array of next generation AI Vision applications with market leading accuracy. The goal of the Vaidio AI Vision Platform is to apply cross-functional AI analytics to help make the world a safer place.

### **About SIA**

SIA is the leading trade association for global security solution providers, with over 1,100 innovative member companies representing thousands of security leaders and experts who shape the future of the

Proud to announce that the Vaidio AI Vision Platform from IronYun has won not one but two 2021 New Product Showcase Awards from SIA's ISC West!

The Vaidio Platform won the Video Analytics category, and the Vaidio Cam App won in Mobile Applications. The New Product Showcase awards “represent the most innovative new security offerings on the market” and are a true testament to the Vaidio platform's broad functionality, accuracy, real-world performance and open integration. Very proud of the team, and inspired to keep pushing forward!
