IntelliSee Wins Big at NSCA Product Innovation Awards

(Coralville, IA) – IntelliSee—an AI-powered risk mitigation platform—was named Overall Winner at the eighth annual Excellence in Product Innovation Awards presented by the National Systems Contractors Association (NSCA). The announcement was made at NSCA’s 24th Annual Business and Leadership Conference in Irving, TX on February 23.

At the event, seven awards were given to companies that have made advances in commercial technology profoundly impacting system integrators. Out of more than 50 companies vying for an Excellence in Product Innovation award, a panel of judges selected IntelliSee as the overall winner for its exceptional performance, ease of use and recurring revenue opportunities for systems integrators.

“The entries we received as part of the Excellence in Product Innovation awards this year were truly impressive,” said Chuck Wilson, NSCA CEO. “Our judges were beyond impressed with IntelliSee’s overall vision, as well as the value it brings both to users and the system integrators who offer the product to customers as a subscription service.”

IntelliSee is a risk mitigation platform that employs deep learning vision AI to identify and respond to threats to human safety—from slip and fall hazards to drawn weapons, trespassers and more. The platform integrates into a user’s existing video surveillance, where it autonomously scans for risks, sending instant alerts to designated contacts in the event a threat is detected.

“Organizations from businesses to hospitals rely on video surveillance to keep their staff, customers and visitors safe, but humans are notoriously unreliable when it comes to monitoring surveillance footage,” says IntelliSee’s Chief Customer Officer, Maureen Pajerski.

“IntelliSee is changing the game by removing human error from the equation. And since its powered by a deep-learning engine, the platform continuously improves the longer it’s in use while teaching itself how to detect new risks. Whenever we update the platform or add new

risk detection modules, we make them instantly available to all our users at no additional cost. This way, we never stop adding value.”

IntelliSee is available through partnering security systems integrators across the United States. To learn more, visit intellisee.com.
