

Opening New Doors to Innovation, Quality and Support!

FOR IMMEDIATE RELEASE

CAMDEN INTRODUCES THE FIRST SURFACE MOUNT RIM STRIKE WITH PRELOAD!

September, 2022 . . . Mississauga, Ontario

Camden Door Controls is pleased to introduce to market the first surface mount RIM strike with preload. This CX-EPD1289L grade 1 surface mount RIM strike with latch monitoring also offers a ‘Universal’ strike design that delivers unparalleled application flexibility, with both UL security and fire listings.

The number one reason that RIM strikes fail to operate is pressure on the keepers of the strike, which is known as preload. Preload can be caused by differences in air pressure on each side of the door, a misaligned door, or simply someone pushing on the door before the strike is unlocked. But regardless of the cause, Camden’s 1289L RIM strike will operate where other strikes fail!

The patented design of these new Camden CX-EPD1289L RIM strikes enables them to operate with up to 15 pounds of preload pressure. This eliminates the need for future service calls for doors that go out of alignment after the strike is installed. And, because Camden offers one universal RIM strike that includes both security and fire ratings, field configured latch monitoring, selectable fail safe, fail secure operation, and dual voltage, there’s no need to stock a range of RIM strike models.

A metal mounting jig is included in the packaging, making installation fast and easy. And, like all Camden strikes, this new 1289L RIM strike is backed by Camden’s exclusive five year no-hassle product warranty.

“Camden is very proud to bring this innovative CX-EPD-1289L surface mount preload RIM strike to market,” says David Price, Camden’s Vice President Communications and Business Development. “Unlike other strikes on the market, if someone leans against the door to apply pressure to the keepers of the strike and then activates a Request-to-Exit switch to unlock the door, the strike binds and will not unlock. But, Camden’s CX-EPD1289L RIM strikes are designed to operate where other strikes fail, setting them apart in the marketplace and ensuring safe and reliable operation.” For more information, please visit <http://www.camdencontrols.com/>

ABOUT CAMDEN DOOR CONTROLS: Camden Door Controls is an industry-leading provider of innovative, high quality and competitively priced door activation, control and locking products. Camden backs its products with superior customer service, technical support, product

delivery and warranty. Camden is **ISO 9001:2018** registered, with extensive product development capabilities, and maintains a 20,000 ft. manufacturing facility. Camden products are designed for compliance to UL standards, building/fire codes and ADA requirements.
