

CONNECTED CORPORATE SECURITY

.....

HOW TO MANAGE THREATS AND RISKS WITH A UNIFIED SECURITY MODEL

Overview

Why connected corporate security is the future of corporate security

What is connected security: **within**, **across**, and **between**

Delivering connected corporate security: Talent and Technology

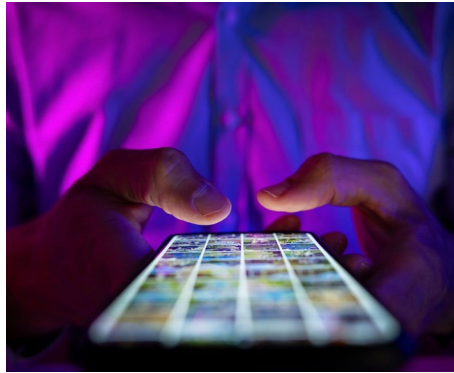

Leading connected corporate security

Why now?

Hybrid risk is changing the security landscape

The Battle
of the
Narrative

Global Instability
and Emerging
Threats to
Business

Activism,
Polarization,
and the Power
of Mobilization

Convergence
of Cyber and
Physical Threats

Today, corporate security is
disconnected and siloed.

Within Corporate Security

Are you mastering your data?

Within Corporate Security

66% of CSOs have no specialist technology skills in their team.

85% of CSOs think strong understanding of technology very important.

55% of CSOs said introducing technology priority in next 12 months.

“With few exceptions, the security community has been behind the curve in its use and implementation of new technologies.”

- *Dave Komendat*

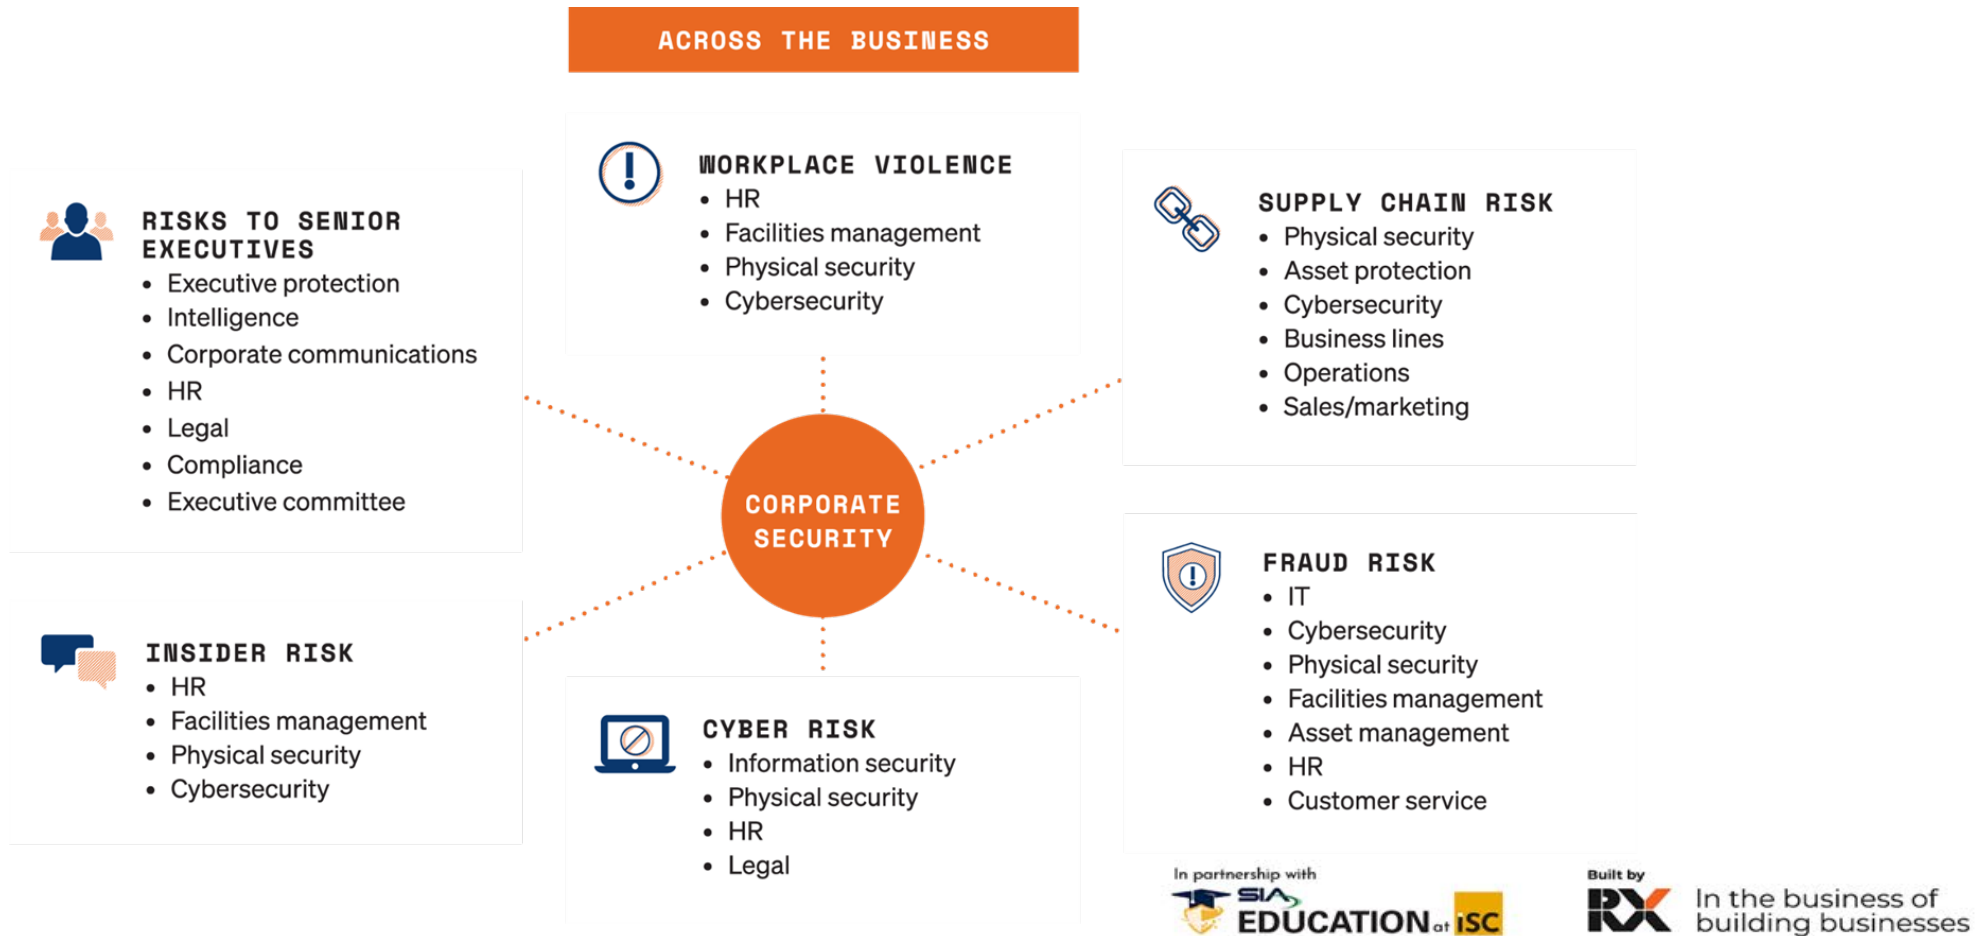

Across the Business

Delivering Connected Corporate Security

Talent

Prioritize skills for connection: collaboration, communication, social skills, stakeholder management, project and vendor management, technology and data analysis

Technology

Technology makes visible something that otherwise is invisible.

The ability to analyze the impact to our company of specific events – it now happens within minutes, not hours.”

Leadership

Evaluate team members for **collaboration and partnership performance**

Encourage and support external network development

Delivering Connected Corporate Security

Partnerships

Foster and promote collaboration across the business: opportunities for team members at all levels

C-Suite Buy-in

To secure support from decision-makers, start with developing a clear and compelling narrative that **illustrates the value of the function**

Metrics

Incorporate metrics that measure collaboration

“What is measured is managed”
