The person is a man with short, dark hair and a light beard. He's wearing a dark blue blazer over a white shirt with a striped tie, and a small blue pocket square. He appears to be well-dressed and confident, suggesting he might be a professional in a field that requires a certain level of presentation or public speaking, such as a business executive, a lawyer, or a consultant.

driven video technology software. As a Fellow, he is likely involved in high-level research, development, and strategic planning for the company. The images show him in various settings, including a presentation or lecture, where he is speaking to an audience, and in a more formal setting, possibly a meeting or a conference.

Retrieval-Augmented Generation (RAG)

RAG & Security

- VLMs extend the capabilities of LLMs;
- Pre-trained VLMs recognize many objects and situations relevant to security;
- VLMs accuracy can be focused via:
 - prompt engineering,
 - In-context learning (few-shot examples),
 - retrieval augmented generation (RAG).

Thank you!
